

HI-TECH DEVICE BODIES MODELING

MAGNIFICO II is the latest device that our skilled staff at Prestige Spa uses to help fight sagging skin and cellulite. The treatment can be performed on a selected area of the body. Before using the Hi-Tech device, we recommend an option that includes a draining scrub, anti-cellulite mask, and a manual massage with a special product. This combination will allow you to achieve spectacular results after just one treatment. For more information, please contact our reception.

INTENSIVE SHAPING, DERMOMASSAGE - ENDOMORPHOLOGY + IR + RF Maximum results are guaranteed by 5 indispensable technologies:

- Ultrasound vacuum liposuction
- RF radiofrequency waves
- IR radiation
- Suction-vacuum massage (endomassage)
- Mechanical roller massage

EFFECTS:

- Rapid reduction of cellulite
- Strong firming and body shaping
- Reduction of fat tissue
- Slimmer silhouette
- Increased tension in the abdominal muscles
- Stimulated circulatory and lymphatic systems
- Smoother skin

HI-TECH DEVICE BODIES MODELING

VIP LINE – Have you already completed a series of treatments to break down fat tissue? Is your skin still not firm enough? Are you slim, but feel like your body used to be different? Have you just finished breastfeeding and would like to finally take care of your skin to restore it to its former condition? The Vip Line is the perfect solution for you. For more information about the treatment, please contact our Spa Reception.

EFFECTS:

- The skin becomes firmer
- We strengthen muscle structures (isolated muscle group training), making the body stronger and the muscle structures more visible
- When performed in a series (minimum 5 treatments), it delivers spectacular results!

| Package of 5 treatments | 1100 zł |
| Package of 10 treatments | 2200 zł |

CRYOLIPOLYSIS

Undoubtedly, it is our iconic treatment for combating fat tissue. Cryolipolysis is a non-invasive, painless, but extremely effective method for the rapid elimination of fat cells. During the treatment, fat tissue undergoes breakdown (lipolysis). The cooled fat cells undergo "controlled death" and are gradually eliminated from the body.

The thickness of the fat tissue decreases, resulting in a LONG-TERM post-treatment effect. One application (two heads), one area of the body.
